WOODEN CRAFT & GIFT

COMPANY PROFILE

Who We Are?

OUR STORY

Dekayu believes if a good product will give the best impact. Dekayu's product with functional value combined with aesthetic value will provide different experiences in various precious moments.

Dekayu wants to provide the best products to symbolize our attention to family, friends, and colleagues. Give the best for a good moment.

And giving turns out to be the best way to enjoy life. A life we lived together. With those, we care about, with those we share our hearts with.

LOCAL SUPPORT

Dekayu supports Craftsmen to grow and innovate in producing Handicraft products. Not only for the aesthetic value but also to add functional value to the products we create.

Starting from only craftsmen in Putat, Wonosari Yogyakarta, and until now, it has expanded to local craftsmen around Central Java and East Java who also give support by supplying products made from wood.

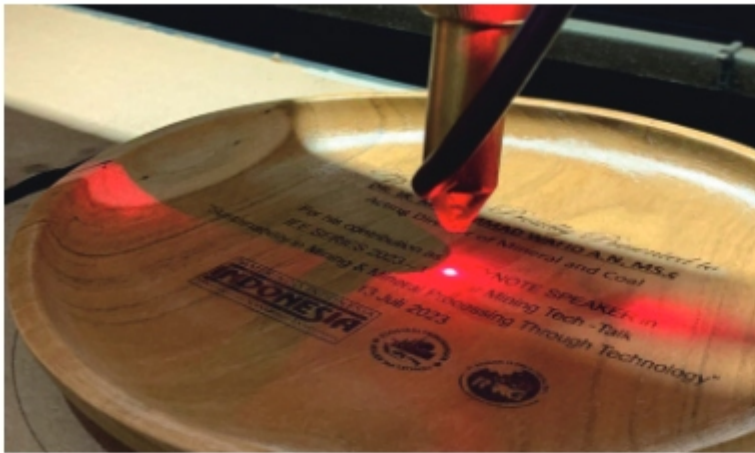

TECHNOLOGY SUPPORT

Product development is not only done by making various product variants but also by maintaining product quality. The accuracy of each product is supported by added technology such as Router Machines, CNC Machines, Laser Engraving Machines, and also a structured process flow at the production site equipped with a wood drying oven.

The process of coating/finishing done by hand (handmade) makes Dekayu products special. The finishing material uses Biopolish Waterbased & Beeswax, which is recommended for coating wood materials whose function has direct contact with food.

Over Billions Sold Of Products

Since 2017 we have provided a variety of wooden craft and gifting products. There are various wood products can be used daily, such as Cutlery, Kitchen Utensils, Home Decorations and Decoration Supports. Also plenty variety as gifts, hampers, presents, and souvenirs represent the warmth of the relationship we want to express together.

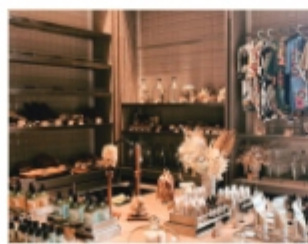

We are grateful that over billions of sold product with millions satisfied customers
